

Micro Stakes

The Micro Stake provides a solution for positioning of micro sprays for landscapes and orchards. Available as a plain stake or fitted with differing lengths of tube to suit most installations.

Features

- Tube piercing point on each stake tip allows creation of holes in laterals, removing the need for a separate installation tool.
- Robust design
- Retaining hole in stake to align and support offtake tubing.
- UV stabilised materials for long life.

Applications

Landscape and agricultural orchard applications.
